

Practice 4 : Classes #2

Ex 1

Write a class having two private variables and one member function which will return the area of the rectangle.

EX 2

Write a program and input two integers in main and pass them to default constructor of the class. Show the result of the additon of two numbers.

Ex 3

Perform addition operation on complex data using class and object. The program should ask for real and imaginary part of two complex numbers, and display the real and imaginary parts of their sum.
